

Mini Project: Customer Sales Insights

Q1. Who are the top 5 customers?

I used **SUM(Sales)** with **GROUP BY** to calculate total sales for each customer. Then I sorted the results in descending order and selected the first five records using **LIMIT 5**.

```
SELECT
    c.`Customer Name`,
    SUM(o.Sales) AS Total_Sales
FROM orders o
JOIN customers c
ON o.`Customer ID` = c.`Customer ID`
GROUP BY c.`Customer Name`
ORDER BY Total_Sales DESC
LIMIT 5;
```

The screenshot shows a 'Result Grid' with a 'Filter Rows' button. The table contains the following data:

	Customer Name	Total_Sales
▶	Sean Miller	25043.05
	Tamara Chand	19017.847999999998
	Raymond Buch	15117.339
	Tom Ashbrook	14595.62
	Adrian Barton	14355.610999999997

Q2. Who are the bottom 5 customers?

This query groups sales by customer and calculates their total sales. The results are sorted in ascending order to identify the customers with the lowest sales contribution.

```
SELECT
    c.`Customer Name`,
    SUM(o.Sales) AS Total_Sales
FROM orders o
JOIN customers c
ON o.`Customer ID` = c.`Customer ID`
GROUP BY c.`Customer Name`
ORDER BY Total_Sales ASC
LIMIT 5;
```

Result Grid			Filter Rows:
	Customer Name	Total_Sales	
▶	Thais Sissman	4.833	
	Lela Donovan	5.304	
	Mitch Gastineau	12.32	
	Carl Jackson	16.52	
	Roy Skaria	22.328	

Result 2 ×

Q3 . Which customers made only one order?

I counted distinct order IDs for each customer and used the **HAVING** clause to filter customers whose order count is exactly one.

```
SELECT
    c.`Customer Name`,
    COUNT(DISTINCT o.`Order ID`) AS Order_Count
FROM orders o
JOIN customers c
ON o.`Customer ID` = c.`Customer ID`
GROUP BY c.`Customer Name`
HAVING COUNT(DISTINCT o.`Order ID`) = 1;
```

Result Grid			Filter Rows:
	Customer Name	Order_Count	
▶	Anemone Ratner	1	
	Anthony O'Donnell	1	
	Carl Jackson	1	
	Jenna Caffey	1	
	Jocasta Rupert	1	
	Lela Donovan	1	
	Mitch Gastineau	1	
	Patricia Hirasaki	1	
	Ricardo Emerson	1	
	Roland Murray	1	
	Susan MacKendrick	1	
	Theresa Coyne	1	

Result 3 ×

Q4. Which customers have above-average sales?

First, I calculated total sales for each customer using a **CTE**. Then I compared each customer's total sales with the average of all customer sales using a subquery.

```
WITH customer_sales AS
(
    SELECT c.`Customer Name`, SUM(o.Sales) AS Total_Sales
    FROM orders o
    JOIN customers c
    ON o.`Customer ID` = c.`Customer ID`
    GROUP BY c.`Customer Name`
)
SELECT *
FROM customer_sales
WHERE Total_Sales >
(
    SELECT AVG(Total_Sales)
    FROM customer_sales
);
```

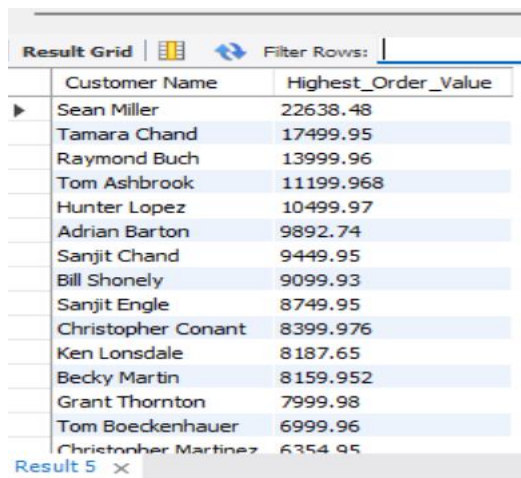

The screenshot shows a SQL query result grid with two columns: 'Customer Name' and 'Total_Sales'. The results are sorted by total sales in descending order. The first customer, Brosina Hoffman, has a total sales value of 6255.351000000001. The last customer shown is Christopher Schild with a total sales value of 3651.8585000000007. The interface includes a 'Result Grid' tab, a 'Filter Rows' input field, and a 'Result 4' label with a close button.

	Customer Name	Total_Sales
▶	Brosina Hoffman	6255.351000000001
	Irene Maddox	4930.4739999999999
	Pete Kriz	8158.654
	Tracy Blumstein	4730.628
	Matt Abelman	4280.6209999999999
	Steve Nguyen	3127.9592000000007
	Linda Cazamias	4481.162
	Ruben Ausman	3832.3139999999994
	Erin Smith	4648.516
	Kunst Miller	4909.4720000000001
	Karen Daniels	8282.358
	Joel Eaton	6400.4549999999999
	Stewart Carmic...	4492.6569999999999
	Christopher Schild	3651.8585000000007

Q5. What is the highest order value per customer?

I used the **MAX()** function to find the highest sales amount recorded for each customer and **grouped** the results by customer name.

```
SELECT
    c.`Customer Name`,
    MAX(o.Sales) AS Highest_Order_Value
FROM orders o
JOIN customers c
ON o.`Customer ID` = c.`Customer ID`
GROUP BY c.`Customer Name`
ORDER BY Highest_Order_Value DESC;
```

The screenshot shows a SQL query result grid with two columns: 'Customer Name' and 'Highest_Order_Value'. The results are ordered by the highest order value in descending order. The first row is Sean Miller with a value of 22638.48. The last row is Christopher Martinez with a value of 6354.95. The grid has a 'Filter Rows' button and a 'Result 5' tab at the bottom.

	Customer Name	Highest_Order_Value
▶	Sean Miller	22638.48
	Tamara Chand	17499.95
	Raymond Buch	13999.96
	Tom Ashbrook	11199.968
	Hunter Lopez	10499.97
	Adrian Barton	9892.74
	Sanjit Chand	9449.95
	Bill Shonely	9099.93
	Sanjit Engle	8749.95
	Christopher Conant	8399.976
	Ken Lonsdale	8187.65
	Becky Martin	8159.952
	Grant Thornton	7999.98
	Tom Boeckenhauer	6999.96
	Christopher Martinez	6354.95
